### Number 1

Thermodynamic optimization for cryogenic systems having one or more parameters piecewise continuous with respect to temperature  
 G. Bisio 3  
 Thermoacoustic oscillations in cryostat: new results  
 A.G. Kuzmina 11  
 Characterization of gaseous helium jet dispersion to atmosphere  
 H.J. Khan, M. Rhee and O. Figueroa 20  
 Stability of large current aluminium-stabilized conductors  
 X. Huang and Y.M. Eyssa 28  
 Design and applications of a very low loss superconducting LC resonator at 4.2 K  
 F. Ayela, J.L. Bret and J. Chaussey 35  
 Cryogenic pressure-temperature and level-temperature sensors  
 D.B. Juanarena and M.B. Rao 39  
 Ceramic chip capacitors as low temperature thermometers  
 R.R. Li, G.P. Berg and D.B. Mast 44  
 Heat transfer in He II under step-wise switching on of heater  
 S.K. Nemirovskii, L.P. Kondaurova and A.Ja. Baltsevich 47  
 Thermal conductivity of YBCO and thermal conductance at YBCO/ruby boundary  
 B.M. Terzijska, R. Wawryk, D.A. Dimitrov, Cz. Marucha, V.T. Kovachev and J. Rafalowicz 53  
 Simple magnetic shielding experiment on high  $T_c$  superconducting bulk ceramics and thin-films, metals and alloys  
 A.A. Hussain and M. Sayer 64

### Number 2

Anomalous on-orbit behaviour of NASA cosmic background explorer (COBE)  
 Dewar  
 S.M. Volz and M.J. DiPirro 77  
 SHOOT orbital operations  
 M.J. DiPirro and P.J. Shirron 85  
 ASTROMAG superconducting magnet facility configured for free flying satellite  
 M.A. Green and G.F. Smoot 91  
 Cooling options for ASTROMAG  
 B.Z. Maytal and S.W. Van Sciver 98  
 Space infrared telescope facility mission and cryogenic design  
 P.V. Mason, D. Petrac, S.W. Petrick and D.M. Strayer 107  
 Mechanical cooler-to-Dewar interfacing in a long-life, hybrid stored cryogen system  
 R.A. Hopkins, S.J. Nieczkoski, D.A. Payne, J.F. Siebert and S.R. Breon 111

Design of a space worthy adiabatic demagnetization refrigerator  
 A.T. Serlemitsos, M. SanSebastian and E. Kunes 117  
 Test performance of a 2 W, 137 K sorption refrigerator  
 L. Wade, E. Ryba, C. Weston and J. Alvarez 122  
 Evaluation of metal hydride compressors for application in Joule-Thomson cryocoolers  
 R.C. Bowman, B.D. Freeman and J.R. Phillip 127  
 Diaphragm Stirling cryocooler developments  
 W.D. Stacy 138  
 Computer simulation model for Lucas Stirling refrigerators  
 S.W.K. Yuan, I.E. Spradley and T.C. Nast 143  
 ISOCAM experiment cryogenic test results  
 L. DeSa and B. Collaudin 149  
 Screen heat exchanger performance comparison  
 J. Luna, R.V. Ravikumar and T.H.K. Frederking 155  
 Low gravity thermal stratification of liquid helium on SHOOT  
 P.J. Shirron and M.J. DiPirro 159  
 High capacity re-entrant groove heat-pipe for cryogenic and room temperature space applications  
 F. Edelstein and R. Kosson 167  
 Description of liquid nitrogen experimental test facility  
 J.M. Jurns, R.E. Jacobs and N.H. Saied 173  
 Screening programme to select resin for gravity probe-B composites  
 E.T. Will 179  
 Simplified generic cryostat thermal model for predicting cryogen mass and lifetime  
 G.C. Birur and G.T. Tsuyuki 185  
 Effect of gas mass-flux on cryogenic liquid jet breakup  
 R.D. Ingebo 191  
 Damping criteria for thermal acoustic oscillations in slush and liquid hydrogen systems  
 Y.F. Gu and K.D. Timmerhaus 194  
 On-orbit cryogenic fluid transfer research at NASA Lewis Research Center  
 W.J. Taylor, D.J. Chato, M.W. Moran and T.W. Nyland 199  
 Self-driven cooling loop for a large superconducting magnet in space  
 A.J. Mord and H.A. Snyder 205  
 Computer program for computing properties of seventeen fluids  
 J.A. Brennan, D.G. Friend, V.D. Arp and R.D. McCarty 212

CONE: an STS-based cryogenic fluid management experiment  
 R.S. Bell, D.M. Vento and G.J. Hanna 215  
 Cryogenic fluid management investigations using the CONE flight experiment  
 W.J. Bailey and H. Arif 221  
 Analysis of cryogenic propellant behaviour in microgravity and low thrust environments  
 M.F. Fisher, G.R. Schmidt and J.J. Martin 230  
 Liquid-vapour surface sensors for liquid nitrogen and hydrogen  
 J.D. Siegarth, R.O. Voth and S.M. Snyder 236  
 Design and testing of a cryogenic mixer pump  
 T.A. Martin, D.H. Beekman and J.E. Dillard 243

### Number 3

Coupling losses in inhomogeneous cores of superconducting cables  
 S. Takács 258  
 Simple calorimeter for temperature range 50-350 K  
 D. Wlosewicz, T. Placowski and K. Rogacki 265  
 Stability considerations for design of a high temperature superconductor  
 A. Abeln, E. Klemt and H. Reiss 269  
 Preparation of  $YBa_2Cu_3O_7$  thin films by reactive evaporation method  
 Ho Jung Chang, Y. Doshida, Y. Watanabe, K. Shimizu, Y. Okamoto, R. Akihama and J.T. Song 279  
 On the problem of thermal link resistances in calorimetry  
 I.V. Velichkov 285  
 End-to-end modelling of He II flow systems  
 A.J. Mord, H.A. Snyder and D.A. Newell 291  
 Bi-directional clipper using superconductors  
 M.V.S. Lakshmi and M. Satyam 300  
 Optimum phase angle between pressure and gas displacement oscillations in a pulse-tube refrigerator  
 M. Kayusa, J. Yuyama, Q. Geng and E. Goto 303  
 Electro- and thermophysical characteristics of thermally controlled cryotrons  
 Yu.P. Chernavsky, V.I. Malkovsky and Yu.V. Skobarikhin 309  
 Pinning characteristics in multifilamentary Nb-Ti superconducting wires with submicrometre filaments introduced as

- Gorter – Mellink pulsed-source problem in cylindrical and spherical geometry  
L. Dresner 450
- Comparison of transient heat transfer characteristics for large stepwise heat input for He I and He II  
M. Shiotsu, K. Hata and A. Sakurai 455
- Comparison of He II cooling systems for superconducting magnets using self-driven mass flow and zero-flow heat pipes  
A.J. Mord and H.A. Snyder 461
- Geometry dependence of steady state heat flow in He II  
J.M. Pfotenhauer 466
- Heat transfer in very narrow channels of low temperature devices used for fluid management of He II in space  
S.W.K. Yuan 473
- Kapitza conductance of PVF-coated copper and some materials used for superconducting magnets  
M. Taneda, T. Miki and T. Ohtani 479
- Normal zone in large composite superconductors  
R. Kupferman, R.G. Mints and E. Ben-Jacob 485
- Hall effect in superconductor stability  
P.W. Eckels and J.H. Parker 490
- Influence of copper-to-superconductor ratio on stability  
O. Tsukamoto, N. Amemiya and T. Takao 494
- Friction phenomena in low- $T_c$  and high- $T_c$  superconductor winding  
Y.I. Kim, S. Caspi, K.V. Ravikumar and T.H.K. Frederking 498
- Acoustic emission monitoring on a model field winding for 70 MW class superconducting generator  
H. Yoshimura, A. Ueda, M. Morita, S. Maeda, M. Nagao, K. Shimohata, Y. Matsuo, Y. Nagata, S. Nakamura, T. Yamada and Y. Nakabayashi 502
- Electrodynamical sources of non-uniform heat production in composite superconductors causing instabilities  
L. Van der Klundert 508
- Metastable composite tape superconductors of high overall current density  
T. Ogasawara, M. Chiba, N. Miyazawa, S. Ban, Y. Kubota and K. Yashohama 513
- Thermal stability of ceramic superconductors  
P.W. Eckels 516
- Influence of operating temperature and contact thermal resistance on normal zone propagation in a metal sheathed high  $T_c$  superconductor tape  
M.K. Chyu and C.E. Oberly

## Number 6

- Precooling system for a Joule – Thomson cryogenerator: design and experimental results  
A. Baldi, A. Baldini, S. Barbanera, E. Borch, M. Bruzzi, F. Grazzini, L. Lombardini and L. Sarti 532
- Semiconductor thermometry at low and ultra-low temperatures using dislocation-doped germanium  
M.L. Kohuch 537
- Magnetocaloric effect. Part 1: An introduction to various aspects of theory and practice  
M.D. Kuz'min and A.M. Tishin 545
- Simple numerical model to interpret a.c. measurements on type II superconductors  
P. Fabbicatore, G. Gemme, R. Musenich, M. Occhetto and R. Parodi 559
- Electromagnetic properties of high  $T_c$  superconductors: relaxation of magnetization  
K. Yamafuji and Y. Mawatari 569
- Optimization studies of solenoidal winding for superconducting magnetic energy storage  
R. Wesche 578
- Influences of cyclic loading at room temperature on the critical current at 4.2 K of Nb<sub>3</sub>Sn superconducting composite wire  
S. Ochiai and K. Osamura 584
- Critical current density in Ag-sheathed wires of Y – Ba – Cu – O  
G. Fuchs, A. Gladun, K. Fischer and C. Rodig 591
- Producing and recording converging second-sound shock waves  
G. Stamm, Th. Olszok, M. van Schwerdtner and D.W. Schmidt 598
- Cryostat for investigations of the thermal conductivity of cryocrystals  
A. Jeżowski and P. Stachowiak 601
- Inexpensive alternative monitor for resistance thermometers of a dilution refrigerator  
K. Hattori, H. Shibayama and T. Mamiya 604

## Number 7

- Thermal conductance of Cu/Cu and Cu/Si interfaces from 85 to 300 K  
J. Yu, A.L. Yee and R. Schwall 610
- Heat capacity entropy and enthalpy of silicone-poly(styrene butadiene) rubber blends from 80 to 300 K  
T. Bhowmick, B.R. Gupta and S. Pattanayak 616
- Thermal conductivity and thermal diffusivity of silicone-poly(styrene butadiene) rubber blends from 60 to 300 K  
T. Bhowmick, B.R. Gupta and S. Pattanayak 623
- New type of superconducting journal bearing using high  $T_c$  superconductors  
M. Komori and T. Kitamura 628
- Dynamic modelling of a Gifford – McMahon cryorefrigerator  
C. Minas and P.M. Haulde 634
- Minimization of self-field effects in a YBa<sub>2</sub>Cu<sub>3</sub>O<sub>7- $\delta$</sub>  superconducting annular conductor  
E.P. Roth, T.C. Bickel, T.J. Gardner and E.L. Venturini 640

- Detection of trapped flux quanta in superconducting films by scanning a SQUID pick-up coil  
H. Minami, Q. Geng, K. Chihara, J. Yuyama and E. Goto 648
- Cool-down period similarity for a fast Joule-Thomson cryocooler  
B. Maytal 653
- Quench analysis of large superconducting magnets. Part 1: Model description  
L. Bottura and O.C. Zienkiewicz 659
- Noise behaviour of Explorer gravitational wave antenna during  $\lambda$  transition to the superfluid phase  
P. Astone, M. Bassan, P. Bonifazi, E. Cocia, C. Cosmelli, S. Frasca and E. Majorana 668
- Performance of CMOS Schmitt trigger at liquid nitrogen temperature  
A. Srivastava 671
- Monolithic multifilamentary Nb<sub>3</sub>Sn conductor tested in small coils wound after heat treatment (R & W)  
P. Kováč and L. Cesnak 675
- Liquid nitrogen cooled sample stage for a scanning electron microscope  
H.L. Chatwal and T.R. Goswami 679
- Low power device for measuring electric fields at low temperatures  
X.L. Hu, Y. Carmi and A.J. Dahm 681
- Thick platinum films as low temperature thermometers  
I. Bat'ko, M. Somora, D. Vanický, K. Flachbart, V. Matej and V. Pavlik 683
- Number 8**
- Thermoacoustic oscillations in cryogenics. Part 1: Basic theory and experimental verification  
H. Luck and Ch. Trepp 690
- Thermoacoustic oscillations in cryogenics. Part 2: Applications  
H. Luck and Ch. Trepp 698
- Thermoacoustic oscillations in cryogenics. Part 3: Avoiding and damping of oscillations  
H. Luck and Ch. Trepp 703
- Superconductivity and flow stress of Al-Li alloys near 1 K  
V.V. Pustovalov, N.V. Isaev, V.S. Fomenko, S.E. Shumilin, N.I. Kolobnev and I.N. Fridlyander 707
- Dilution refrigerator performance  
R.L. Fagaly and D.N. Paulson 711
- Phase sensitive technique for the study of noise properties of HTS junctions  
S.G. Hammond, Y. He, C.M. Muirhead, M.S. Colcough and K. Char 715
- Quench analysis of large superconducting magnets. Part 2: Model validation and application  
L. Bottura and O.C. Zienkiewicz 719
- Forced liquid helium flow transient heat transfer in narrow channel under step heat flux  
I.L. Yarmak and V.M. Zhukov 729
- Number 9**
- Enhanced flux pinning by Zn-substitution in GdBa<sub>2</sub>Cu<sub>3</sub>O<sub>7- $\delta$</sub>   
R.G. Kulkarni, R.V. Upadhyay, G.K. Bichile and I.A. Shaikh 770
- Boiling-up process in He II: optical measurements and visualization  
M.V. Scherdtner, G. Stamm, A.N. Tsoi and D.W. Schmidt 775
- Critical current in DyBa<sub>2</sub>O<sub>7- $\delta$</sub>  single crystals  
N.E. Alekseevskii, S.F. Kim, A.I. Kharkovski and T. Palewski 781
- Numerical modelling of an orifice pulse tube refrigerator  
C. Wang, P. Wu and Z. Chen 785
- Microsphere viscometers for low temperature applications  
K. Gloos, W. Schoepe, J.T. Simola and J.T. Tuoriniemi 791
- Strength and critical current density of Bi(Pb)-Sr-Ca-Cu-O and Y-Ba-Cu-O in silver-sheathed superconducting tapes  
S. Ochiai, K. Hayashi and K. Osamura 799
- Measurement of the low-field Hall coefficients by d.c. SQUID technique  
F. Sachslehner and W. Vodel 805
- <sup>3</sup>He cryostat for optical spectroscopy using a single-fibre optic system  
P. Orens 810
- Determination of critical currents from the width ( $\Delta H$ ) of hysteresis loops of type II superconductors  
M.A.R. LeBlanc 813
- Analysis of self-cooled binary current leads containing high temperature superconductors  
J.R. Hull, A. Unal and M.-C. Chyu 822
- Steady pressure drop and quench pressure rise in cable-in-conduit superconductor  
E. Tada, Y. Takahashi, H. Tsuji, K. Okuno, T. Ando, T. Hiyama and K. Koizumi 829
- Cryogenic leak testing of tube fittings/valves  
L.X. Jia, D. Moslemian and W.L. Chow 833
- Preparation and characterization of high T<sub>c</sub> Bi(Pb)-Sr-Ca-Cu-O thin films  
V.V. Rao, R. Subramanian, V. Misra and V.R. Kalvey 840
- Ideal orifice pulse tube refrigerator performance  
P. Kittel 843
- Number 10**
- Development and preflight qualification testing of a range of cryogenic coolers for application from 20 to 80 K  
B.G. Jones and S.R. Scull 850
- Development of a variable speed G-M machine  
P. Mirmobin 859
- Study of current redistribution in an aluminium stabilized superconductor  
A. Lee, R.H. Wands and R.W. Fast 863
- Alloys of Fe-Rh system as a new class of working material for magnetic refrigerators  
M.P. Annaorazov, K.A. Asatryan, G. Myalikgulyev, S.A. Nikitin, A.M. Tishin and A.L. Tyurin 867
- Electrical and thermal conductivity and magnetization of some austenitic steels, titanium and titanium alloys at cryogenic temperatures  
O. Umezawa and K. Ishikawa 873
- Planar YBa<sub>2</sub>Cu<sub>3</sub>O<sub>7</sub> gradiometer at 77 K  
S. Knappe, D. Drung, T. Schurig, H. Koch, M. Klinger and J. Hinken 881
- Development of extruded polymer insulated superconducting cable  
M. Kosaki, M. Nago, Y. Mizuno, N. Shimizu and K. Horii 885
- Thermoacoustic theory for cyclic flow regenerators. Part 1: Fundamentals  
J.H. Xiao 895
- Dilution refrigeration for measurement of acoustic de Haas-van Alphen effect  
T. Goto, S. Sakatsume, A. Sawada, H. Matsui, R. Settai, S. Nakamura and Y. Otani 902
- Pulse method for simultaneous measurement of electric thermopower and heat conductivity at low temperatures  
O. Maldonado 908
- Investigation of annealing effects on ultra pure copper  
T. Shigematsu, K. Morita, Y. Fujii, T. Shigi, M. Nakamura and M. Yamaguchi 913
- Number 11**
- Flux pinning by non-superconducting inclusions in melt processed YBaCuO superconductors  
M. Murakami, K. Yamaguchi, H. Fujimoto and N. Nakamura 930
- Flux pinning in Ti(1223) superconductor  
K. Aihara, T. Doi, A. Soeta, S. Takeuchi, T. Yuasa, M. Seido and T. Kamo 936
- Status of HTS: progress in improving transport critical current densities in HTS Bi-2223 tapes and coils  
C.H. Rosner, M.S. Walker, P. Haldar and L. Motowidlo 940
- Influence of oxygen deficiency on the critical current properties of MPMG processed YBa<sub>2</sub>Cu<sub>3</sub>O<sub>7- $\delta$</sub>   
N. Nakamura, M. Murakami, H. Fujimoto and N. Koshizuka 949
- Microstructures and critical currents in melt-processed YBCO  
H. Fujimoto, T. Takahiro, M. Murakami, N. Nakamura and N. Koshizuka 954
- Flux jumps in the magnetization of QMG-Y<sub>1</sub>Ba<sub>2</sub>Cu<sub>3</sub>O<sub>7</sub>  
K. Watanabe, S. Awaji, N. Kobayashi, S. Nimori, G. Kido, K. Kimura and M. Hashimoto 959
- Properties of large-scale melt-processed Y-Ba-Cu-O samples  
S. Gauss, S. Elschner and H. Bestgen 964
- Magnetic and electric transport properties of Ag/(Bi, Pb)-Sr-Ca-Cu-O superconducting fibres  
A. Badia, Y.B. Huang, G.F. de la Fuente, M.T. Ruiz, L.A. Angurel, D. Lera and C. Rillo 969
- Scaling laws for the volume pinning force in high temperature superconductors  
L. Niel 975
- Flux trapping in high T<sub>c</sub> superconductor single crystals in tilted magnetic field  
S. Kolesnik, T. Skoskiewicz, J. Igalson and Z. Korczak 979
- Systematics of flux pinning *versus* oxygen deficiency *d* in aligned Y<sub>1</sub>Ba<sub>2</sub>Cu<sub>3</sub>O<sub>7- $\delta$</sub>  materials  
J.G. Ossandon, J.R. Thompson, D.K. Christen, Y.R. Sun, B.C. Sales, H.R. Kerchner and J.E. Tkaczyk 982
- Studies of intergrain critical currents in YBCO using superconducting ceramic rings  
J. Jung, I. Isaac and M.A.-K. Mohamee 988

# Index

Low-field irreversibility line of  $\text{Bi}_2\text{Sr}_2\text{Ca}_2\text{Cu}_3\text{O}_{10}$  high temperature superconductors  
L. Miu 991

Low field diamagnetic characteristics of sintered high  $T_c$  superconductors  
R.De. Luca, S. Pace and A. Saggese 995

Interdiffusion between YBCO and Bi-based high  $T_c$  superconducting ceramics  
L. Schmirgeld, P. Regnier, X. Deschanelles and F. Maurice 1000

Magnetic field and temperature dependence on the transport critical current density and flux pinning in anisotropic  $(\text{Bi,Pb})_2\text{Sr}_2\text{Ca}_2\text{Cu}_3\text{O}_7$   
P. Kottman, H. Jones, V. Plechacek and M. Polack 1005

Influence of multiple intermediate processing on critical current density and trapped magnetic field in Bi, Pb-Sr-Ca-Cu-O superconductor  
V. Plechacek 1010

Design, construction and development of apparatus for transport current characterization of high temperature superconductors  
A.J. Frost and H. Jones 1014

Weak link behaviour and critical currents in ceramic high  $T_c$  superconductors  
T.B. Doyle and R.A. Doyle 1019

Interaction between intragrain currents and transport current in bulk  $\text{YBaCuO}$   
A.R. Kuper, H. Hemmes and H. Rogalla 1027

Unusual form of the temperature and field dependence of the grain boundary weak link dissipation in Ag sheathed BSCCO (2223) tapes  
S.M. Cassidy, L.F. Cohen, M.N. Cuthbert, S.X. Dou and A.D. Caplin 1034

Characterization of Ag-sheathed  $(\text{Bi, Pb})_2\text{Sr}_2\text{Ca}_2\text{Cu}_3\text{O}_{10-x}$  multifilamentary tapes  
Q.Y. Hu, H.K. Liu and S.X. Dou 1038

Effect of bias field (up to 1 T) on a.c. susceptibility of  $\text{Cr}_{0.3}\text{Ti}_{1.7}\text{Ba}_2\text{Ca}_2\text{Cu}_3\text{O}_x$   
J.S. Munoz, M. Pont, T. Puig, Z.Z. Sheng, Y. Xin, D.X. Gun and D.O. Pedersen 1042

Effects of cation substitution on flux pinning in Bi-2212 superconductors  
M. Wakata, S. Takano, F. Munakata and H. Yamauchi 1046

Influence of thermomechanical treatment on critical currents in Ag-sheathed BSCCO 2223 tapes  
D.J. Brauer, D. Busch, R. Eujen, A. Gladun and J. Hudenpohl 1052

Critical currents and relaxation in Bi-based ceramic superconductors  
A.A. Zhukov, D.A. Komarkov and J. Mirokovic 1056

Flux creep in superconducting Y-Ba-Cu-O and Bi-Pb-Sr-Ca-Cu-O  
M. Majoros, P. Kottman, W. Schauer, V. Windte, J. Reiner and V. Plechacek 1061

Angular dependence of critical currents of high temperature superconducting films in high magnetic fields prepared by metal organic deposition  
D.H. Liebenberg, P.C. McIntyre and M.J. Cima 1066

Correlations between critical current density and microwave surface impedance of epitaxial  $\text{YBa}_2\text{Cu}_3\text{O}_{7-d}$  films

A. Gladun, N. Cherpak, A. Gippius, S. Hensen, M. Lenkens, G. Muller and S. Orbach 1071

Magnetic flux distribution and magnetic relaxation in polycrystalline Bi,Pb-Sr-Ca-Cu-O superconductors  
J. Paasi, M. Polak, M. Lahtinen, V. Plechacek and L. Soderlund 1076

Flux pinning in  $\text{YBa}_2\text{Cu}_3\text{O}_7$  thin films grown by d.c. magnetron sputtering  
J. Magnusson, P. Norling, P. Svedlindh, P. Nordblad, L. Lundgren, T.I. Selinder and Z. Han 1084

Critical magnetic field angle for high field current transport in  $\text{YBa}_2\text{Cu}_3\text{O}_7$  at 76 K  
J.W. Ekin 1089

Deep pinning centres in Bi-Sr-Ca-Cu-O thin films at weak magnetic fields  
G. Jung, B. Savo and A. Vecchione 1093

Modified flux-line shear model: possible mechanism of flux-line motion in high temperature superconductors  
R. Wordenweber 1098

Magnetic shielding properties of plasma sprayed  $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$  on nickel substrates  
D. Castello, J. Fontcuberta, M. Pont and J.S. Munoz 1104

Critical currents in granular YBCO films  
B. Ullmann and H.C. Freyhardt 1109

## Number 12

Enhancement of magnetoresistance due to Hall current in aluminium-copper composite  
H. Kaneko and N. Yanagi 1114

Acoustic quality factor of copper, brass and beryllium copper from 50 mK to 300 K  
W. Duffy, Jr 1121

Parametric analysis and optimization of a Gifford-McMahon cryorefrigerator  
C. Minas 1125

Transient nucleate boiling of liquid nitrogen with a stepwise change of heat flux  
V.I. Malkovsky, V.M. Ivanov, V.A. Bogachev and F.B. Melamed 1131

Investigations into the thermal performance of multilayer insulation (300-77 K). Part 1: Calorimetric studies  
S. Jacob, S. Kasthuriengan and R. Karunanithi 1137

Investigations into the thermal performance of multilayer insulation (300-77 K). Part 2: Thermal analysis  
S. Jacob, S. Kasthuriengan and R. Karunanithi 1147

Entropy generation in a high temperature superconducting current lead  
D.P. Sekulic, Z. Uzelac and F.J. Edeskuty 1154

Performance of CMOS three-valued logic device (ternary inverter) at liquid nitrogen temperature  
A. Srivastava 1162

$\text{RuO}_2$ -based thick-film resistors as high sensitivity thermometers for millikelvin temperatures  
I. Bat'ko, M. Somora, D. Vanicky and K. Flachbart 1167

## Book reviews

Applications of Cryogenic Technology:  
 Volume 10, edited by J.P. Kelley  
 P. Komarek 847

Cryogenic Wind Tunnels: A  
 Comprehensive, Annotated Biography by  
 M.H. Tuttle, R.A. Kilgore and D.L.  
 Moore  
 D.A. Wigley 846

Heat transfer enhancement and energy  
 conservation, edited by Song-Jiu Deng  
 R.W. James 414

Quantized Vortices in Helium II by R.J.  
 Donnelly  
 A. Hofmann 414

Superconductor Electronics: Fundamentals  
 and Microwave Applications by J.H.  
 Hinken  
 H. Koch 846

## Conference reports

Symposium on Applied Superconductivity,  
 Karlsruhe, Germany, 30 September - 2  
 October 1991  
 J. Gerhold 251

Sixteenth Annual Condensed Matter  
 Physics Meeting, Hanmer Springs, New  
 Zealand, 29 - 31 January 1991  
 G.K. White 738

Twenty-fifth Anniversary of the Cryogenic  
 Association of Japan  
 H. Hirabayashi 845

Fourth International Workshop on Low  
 Temperature Detectors, Oxford, UK,  
 4 - 7 September 1991  
 S.E. King and D. VanVechten 686

Technology Transfer in Cryogenics, Hamburg,  
 Germany, 17 - 18 October 1991  
 H. Quack 606
